IGEL

Apps

# UMS + IGEL OS + IMH = Published Windows Apps

- Windows apps delivered locally from an IMH virtual machine
- Central control through Universal Management Suite
- Foundation for future capabilities
  - Application lifecycle management
  - App discovery
  - Scalable app publishing

# Real Customer Use Case

## Offline Microsoft Office requirement:

- Full blown office experience
- Offline access for employees on the road
- Windows must remain immutable
- No Windows desktop access for users

### RESULT:

Users launch only the Office applications available on the IGEL OS12 desktop

# IGEL App Portal Update

## 120+

Apps with regular updates and new features

## IGEL Ready

New category of partners in SaSE and SSE

## Customer Apps

App Creator Portal enables customer to build their own apps

## New Use Cases

Drive new app categories

The screenshot displays the IGEL App Portal interface. At the top, there is a navigation bar with the IGEL logo and an 'Explore' button. Below this, a sidebar menu titled 'Discover Our Apps' contains a search bar and a 'Last Update' dropdown. The main content area features a grid of application cards, each with a 'New' badge, a title, version number, a 'Download' button, and details for 'Last update' and 'Size'. The cards include:

- signoPAD-API/Web for IGEL OS**: 3.4.0 BUILD 4.0, 2 MB, updated 06. March 2025.
- Island Browser**: 1.60.22 BUILD 1.0, 155.25 MB, updated 05. March 2025.
- IGEL OS Base System**: 12.6.0 PR 2, 1.15 GB, updated 04. March 2025.
- ControlUp Edge DX Agent**: 2.16.1 BUILD 5491.0, 7.25 MB, updated 04. March 2025.

The sidebar menu lists various categories: All, Authentication, Base System, BIOS, Browser, Browser-Based Application, Cloud, Codec, Debug, and Device Redirection.

# Secure Productivity: Netskope + IGEL

Next-Generation Browser for Distributed Enterprise

Netskope One E

IGEL **now & next** Client Application

COMING SOON EA

# ANNOUNCEMENT

Gran  
& Vis

The Netskope One browser delivers deep inspection and real-time DLP, securing sensitive data within SaaS and internal web apps without the cost or complexity of traditional VDI.

The Netskope One Client serves as a high-performance unified agent, providing secure, ZTNA-based access to web, cloud, and private applications directly from any IGEL-powered endpoint.

# Updated IGEL Digital Signage App

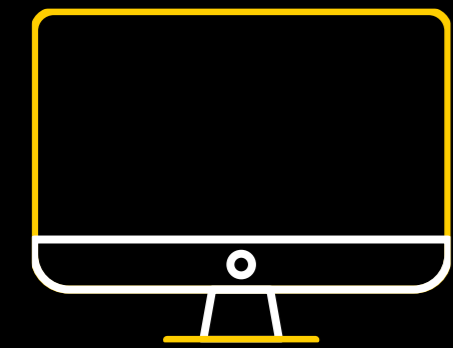

## **Supports diverse media types:**

Webpages, real-time dashboards, videos, and slideshows for rich storytelling.

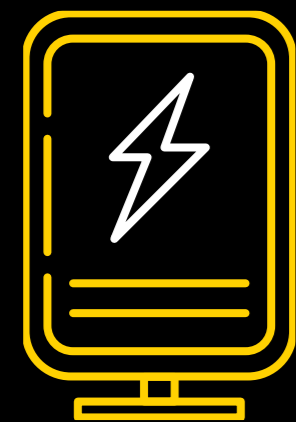

**Interactive kiosk mode** supports touch and mouse input to boost engagement and self-service

**Multi-screen layouts** enable up to six screens per endpoint for complex signage and split zones.

**Flexible features** empower consistent, impactful messaging across multiple locations and devices

**Centralized management** via IGEL's UMS simplifies configuration and content deployment.
