Smarter Supplier Management

**ARCUS**<sup>®</sup>  
Supplier Management Software

# FACTSHEET

**ARCUS**<sup>®</sup> is a premium, cloud-based platform developed to manage processes across eSourcing and supplier risk management. When modules are utilised in a single, connected source-to-contract solution, you gain the benefit of a **comprehensive and holistic approach to sourcing**.

## Advantages

### Effective Risk Management

With the support of cloud-based technologies, comprehensively manage risk across supply base by minimising error, embed ESG considerations, and make more informed decisions.

### Efficient & Accurate Data Exchange

Reduce data re-entry by automatically transferring tender answers to the awarded SIM supplier record, and auto-populating existing SIM answers in any new sourcing events.

### Streamlined Administration

Through automated alerts, and API integrations, the administrative process is effectively streamlined, saving your team precious time that can be directed towards strategic projects.

### Improved Data Integrity

By operating using a single source of supplier data, entered by a supplier directly, you can have confidence that data integrity has been maintained throughout the process.

## Complete Single S2C Solution

Transform your source-to-contract processes and empower procurement to manage each stage, from initial sourcing, through to supplier evaluation with saved time, improved efficiency and enhanced visibility.

## Data Visualisation

With intelligent reporting capabilities, users can transform procurement data in compelling visuals, from charts to interactive reports. This facilitates meaningful insight, allowing you to easily identify patterns in information, and make informed, data-driven decisions. No more guesswork.

## Quick, Responsive and Personalised Service

Our dedicated team is committed to providing timely support to ensure that you maximise value from the system. Discover the benefits of a tailored solution over off-the-shelf software that doesn't fit your requirements.
